Re: Revenue by Region — Summary

Overview

Current revenue by region totals **465k USD** across four regions. The East region leads at **140k (30.1%)**, followed by North at **120k (25.8%)**, West at **110k (23.7%)**, and South at **95k (20.4%)**.

Key Points

- **East is the top performer** at 140k, 20k above the regional average of ~116k.
- **South lags** at 95k, roughly 32% below East; it is the clear priority for growth initiatives.
- North and West sit close to the average, contributing a combined 230k (49.5%) of total revenue.
- The spread between the highest and lowest region is 45k, indicating moderate but meaningful regional disparity.

Recommendation

Replicate East’s successful sales practices in South and West, targeting South to close at least half of its 45k gap to East in the next period. A chart of revenue by region is attached (revenue.png).
